

Build IT Consulting Ltd is a specialist consultancy offering independent advice and services to businesses operating in the Construction Industry.

coins services

BITC have over 23 man years of experience implementing, supporting and using the COINS system. We have built up an enviable customer base, over the last 4 years, of both large and small companies, who use our targeted, cost effective, customer centric services to help them optimise their use of COINS and ultimately add value to their businesses.

COINS is a major investment for your business, so please ask yourself these questions:

- Are you happy with the way you are using COINS?
- Are there new modules that could help your business?
- Are your coding structures no longer suitable for your business needs?
- Do you have a disaster recovery strategy in place?
- Are you able to produce the reports that you need for your business?

BITC Services Overview

Build IT Consulting can offer services to help you in all these areas and more. We can tailor our services to meet your requirements and help you optimise the use of your COINS solution and your investment in the system:
